Applies to 1 target: main .

Branch protections

☐ **Restrict creations**
   Only allow users with bypass permission to create matching refs.

☐ **Restrict updates**
Only allow users with bypass permission to update matching refs.

☐ **Restrict deletions**
Only allow users with bypass permissions to delete matching refs.

☐ **Require linear history**
Prevent merge commits from being pushed to matching branches.

☐ **Require deployments to succeed before merging**
Choose which environments must be successfully deployed to before branches can be merged into a branch that matches this rule.

☐ **Require signed commits**
Commits pushed to matching branches must have verified signatures.

☐ **Require a pull request before merging**
Require all commits be made to a non-target branch and submitted via a pull request before they can be merged.

Additional settings ⌃

Required approvals

[10 ▾]

The number of approving reviews that are required before a pull request can be merged.

☐ **Dismiss stale pull request approvals when new commits are pushed**
New, reviewable commits pushed will dismiss previous pull request review approvals.

☐ **Require review from Code Owners**
Require an approving review in pull requests that modify files that have a designated code owner.

☐ **Require approval of the most recent reviewable push**
Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

☐ **Require conversation resolution before merging**
All conversations on code must be resolved before a pull request can be merged.

☐ **Require status checks to pass before merging**

Choose which status checks must pass before branches can be merged into a branch that matches this rule. When enabled, commits must first be pushed to another branch, then merged or pushed directly to a branch that matches this rule after status checks have passed.

☐ **Block force pushes**

Prevent users with push access from force pushing to branches.
